PERSONAL PROFILE

I am a MERN stack developer with expertise in building visually appealing and user-centric web applications. My technical skills span the full stack, with a focus on React, JavaScript, MongoDB, Node.js, and Express.js to create dynamic and responsive interfaces and robust backend systems. My goal is to build efficient, scalable applications that seamlessly align with user needs and business goals.

SKILLS AND EXPERTISE

Front End:- React.js, JavaScript, CSS3, Tailwind CSS

Back End:- MongoDB, Node.js, Express.js, Firebase

Tools:- Git, GitHub, Netlify, Vercel

PROJECTS

Giftap - Your gifting Solution (Team Project)

Live link || Client Code || Server Code

Giftap is an e-commerce platform that simplifies purchasing and delivering digital and physical gifts. It offers personalized options, scheduling, real-time tracking, and digital gift cards, catering to both individuals and businesses for convenient, flexible gifting solutions.

My Contribution to Giftap: implemented all homepage features—gift categories, product highlights, FAQs, and reviews—to boost engagement. I also developed a user dashboard with a Stripe subscription model, enabled seller ad uploads with admin approval, and integrated secure payment and authentication. Additionally, I explored diverse technologies to enhance functionality and user experience.

Features:- Gift Personalization, Gift Scheduling, Real-time Delivery Tracking, Digital Gift Cards, Multi-User System, Seller Comparison, Recent Views, Chat with Seller via Socket.io, Real-time Notifications, Gift Subscriptions & Occasion-Based Offers

Technology Used:- Front-end React.js, Backend- Express.js, Node.js, Database- MongoDB, Real-time communication- Socket.io, Authentication- Firebase, Security- JSON Web Tokens (JWT)
